

Dumping Commodity Register

Hollow Structural Sections

Exported from the People's Republic of China, The Republic of Korea,
Malaysia and Taiwan

Document release date	Brief description of change(s)
19 November 2015	Redesign of DCR
17 February 2016	Amendment to measures on Dalian Steelforce from China
1 March 2016	Addition of manufacturer/supplier relationship.
18 March 2016	Addition of tariff sub-headings following anti-circumvention investigation.
18 August 2016	Removal of revoked TCO
24 November 2016	Addition of TCO following exemption inquiry
8 June 2017	Addition of securities for exporter Melewar Steel Tube Sdn Bhd
19 June 2017	Addition of securities for exporter Sino Sources Tech Co., Ltd.
3 July 2017	Continuation of measures, changes to forms of measures, changes to duty calculation information, update to exporter tables, new duty assessment periods table
18 January 2018	Removal of securities for Sino Sources Tech Co. Ltd
30 January 2018	Addition of manufacturer/supplier relationship.
6 March 2018	Addition of exporter, Qingdao Xianxing Steel Pipe Co. Ltd to Chinese measures.

Note:

DCRs notify the outcomes of finalised investigations and should be read in conjunction with any relevant current investigations, such as reviews and inquiries. Please refer to the [Cases page](#) on the website to locate any current information for this commodity.

Contents

1. What countries do measures apply to?	3

11. What tariff classifications and statistical codes are covered by the anti-dumping measures?	11
12. What are the duty assessment importation and application period dates?	12

Question	Response
1. What countries do measures apply to?	<p>On 3 July 2017, anti-dumping measures in the form of interim dumping duties (IDD) were varied following a continuation inquiry on hollow structural sections (HSS) exported from the People’s Republic of China (China), Republic of Korea (Korea), Malaysia and Taiwan.</p> <p>Anti-dumping measures in the form of interim countervailing duties (ICD) have been varied following a continuation inquiry on HSS exported from China, except for exports by Huludao City Steel Pipe Industrial Co. Ltd, Dalian Steelforce Hi-Tech Co. Ltd and Qingdao Xianxing Steel Pipe Co. Ltd</p> <p>For more information please refer to Final Reports REP 379 and REP 381 and Anti-Dumping Notices 2017/70 and 2017/71</p> <p>On 18 March 2016, additional tariff sub-headings were included following an anti-circumvention inquiry of the anti-dumping measures. For more information please refer to the Final Report REP 291 and Anti-Dumping Notice 2016/24.</p>
2. What types of hollow structural sections are subject to anti-dumping measures?	<p>The ‘description of goods’ subject to measures are:</p> <p>Certain electric resistance welded pipe and tube made of carbon steel, comprising circular and non-circular hollow sections. Normally referred to as either CHS (circular or oval hollow sections) or RHS (rectangular or square hollow sections) collectively referred to as hollow structural sections (HSS).</p> <p>Finish Types</p> <ul style="list-style-type: none"> • Galvanised (including in-line galvanised (ILG), pre-galvanised or hot-dipped galvanised (HDG)); or • Non-galvanised (including, but not restricted to, painted, black, lacquered or oiled finishes). <p>Sizes</p> <ul style="list-style-type: none"> • Circular products – outside diameter exceeding 21 mm up to and including 165.1 mm; or • Oval, square and rectangular products – perimeter up to and including 1277.3 mm; that may also be categorised according to minimum yield strength, the most common classifications being 250 and 350 mega Pascals (MPa). <p>The following descriptions are <i>excluded</i> from measures, exemption type “GOODS” applies:</p> <ul style="list-style-type: none"> • Conveyor tube made for high speed idler rolls on conveyor systems with inner and outer fin protrusions removed by scarfing; • (not exceeding 0.1 mm on outer surface and 0.25 mm on inner surface), and out of round standards (i.e. ovality) which do not exceed 0.6 mm in order to maintain vibration free rotation and minimum wind noise during operation; • Precision RHS with a nominal thickness of less than 1.6 mm; and • Air heater tubes to AS 2556.

<p>2. What types of hollow structural sections are subject to anti-dumping measures? (continued)</p>	<p><u>Ministerial Exemption Instrument No 1 of 2016</u></p> <p>IDD and ICD do not apply to goods subject to Tariff Concession Order (TCO) 1609617 with an effective date of 16 February 2016.</p> <ul style="list-style-type: none"> • Tubes, square or rectangular, electric resistance welded, complying with Australian/New Zealand Standard 1163:2009 (AS/NZS 1163:2009), Grade C350L0 OR C450L0, with a perimeter not less than 1,050 mm and having either: <ul style="list-style-type: none"> ○ silicon content plus 2.5 times the phosphorus content NOT greater than 0.09%; ○ silicon content greater than 0.14% and NOT greater than 0.24% <p>For more information about the description of the goods subject to measures, please refer to Final Reports REP 381 and REP291.</p> <p><u>Please Note:</u></p> <ol style="list-style-type: none"> 1. The above goods description differs slightly from anti-dumping measures currently in place for HSS exported from Thailand. 2. When importing goods into the country importers are required to self-assess whether the imported goods meet the goods description outlined above and whether anti-dumping measures apply. 3. The Anti-Dumping Commission is not in a position to provide advice on whether certain goods meet the description above. 4. The use of exemption types is subject to monitoring by the Anti-Dumping Commission (the Commission) and the Department of Immigration and Border Protection (DIBP).
<p>3. How much Interim Dumping Duties (IDD) and Interim Countervailing Duties (ICD) will an importer have to pay?</p>	<p><u>IDD – all exporters from China and Malaysia; Ursine Steel Co Ltd (Taiwan) and ‘All other exporters’ from Taiwan</u></p> <p>IDD is in the form of a fixed and variable measure. The total IDD liability is calculated as follows:</p> <ul style="list-style-type: none"> • fixed component of IDD: dumping export price (DXP) or ascertained export price (AEP), whichever is the greatest, multiplied by the applicable IDD ad valorem duty rate; plus • variable component of IDD: the amount, if any, by which the DXP is lower than the AEP. <p><u>IDD – all exporters from Korea and Taiwan (except Ursine Steel Co Ltd and ‘All other exporters’ from Taiwan)</u></p> <p>IDD is in the form of a floor price measure. The total IDD liability is the amount, if any, by which the DXP is lower than the normal value (NV).</p> <p><u>ICD – all exporters from China (except Huludao City Steel Pipe and Dalian Steelforce)</u></p> <p>ICD liability is calculated by multiplying the DXP by the ICD ad valorem duty rate.</p>

4. Example of how to calculate the Interim Dumping Duties (IDD) and Interim Countervailing Duties (ICD) liability

Fixed and variable measures

The following is an **example** of how to calculate the IDD and ICD liability of a fixed and variable measure.

- DXP = AUD \$1,000 (Free-On-Board (FOB), cash)
- AEP = AUD \$2,000 (FOB, cash)
- IDD ad valorem rate = 10%
- ICD ad valorem rate = 15%

IDD liability

Fixed component of IDD:

The higher of the DXP (\$1,000) or AEP (\$2,000) multiplied by the IDD ad valorem rate (10%): $\$2,000 \text{ (AEP)} \times 10\% = \200

Variable component of IDD:

The amount, if any, by which the DXP (\$1,000) is lower than the AEP (\$2,000): $\$2,000 - \$1,000 = \$1,000$

Total IDD liability: \$1,200 ($\$200 + \$1,000$)

ICD liability: The DXP (\$1,000) multiplied by the ICD ad valorem rate (15%) = \$150

Floor Price measures

The following is an **example** of how to calculate the IDD liability of a floor price measure.

- DXP = AUD \$1,000 (Free-On-Board (FOB), cash)
- NV = AUD \$2,000 (FOB, cash)

IDD liability

The amount, if any, by which the DXP (\$1,000), is lower than the NV (\$2,000)
 $\$2,000 - \$1,000 \text{ (DXP)} = \$1,000$.

5. What is the dumping export price (DXP) and how do I calculate it?

The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.

The DXP should be recorded on the relevant Full Import Declaration in the same terms as the AEP or NV for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified for the AEP or NV.

For example, if the AEP or NV terms are “FOB, cash” and the actual invoice terms of the goods are “CIF, 60 days, packed”, the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.

- step 1 - an adjustment for interest on credit terms will need to be made; and
- step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price.

Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.

An example of adjusting for credit and incoterms is provided below:

- Invoice terms = CIF, 60 days
- Specified terms = FOB, cash
- Export price - invoice amount = \$1,000
- Marine insurance and ocean freight amount = \$100

Step 1 - adjust for credit terms

1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%)
2. If the invoiced CIF, 60 days price is \$1,000, then the CIF, cash price = \$980 (\$1,000 less 2%)

Step 2 - adjust for incoterms

3. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent
4. CIF, cash price of \$980 minus freight and insurance amount of \$100 = \$880
5. The DXP price = \$880 FOB, cash

For further instructions/examples on how to calculate the DXP, please refer to the [Anti-Dumping Commission website](#).

<p>6. What information is needed to complete an import declaration for goods subject to measures?</p>	<p>The information required by an importer or Customs broker to complete an import declaration for goods subject to IDD/DSA is:</p> <ul style="list-style-type: none"> • DXP; • Dumping Specification Number (DSN) or exemption type (where appropriate); • Country (this is usually country of origin or export country); • Tariff classification and statistical code; • Exporter / supplier; and • Quantity. <p>Please see below to determine which DSN applies to the exporter of your goods.</p> <p>Further advice on how to complete an import declaration for goods subject to anti-dumping measures is available on the Anti-Dumping Commission website</p>																																
<p>7. What DSN do I use for my imported goods and what are the rates for my exporter?</p>	<p>The following DSNs apply to goods exported from China, Malaysia and Taiwan and entered for home consumption on or after 3 July 2017.</p> <table border="1" data-bbox="450 730 2047 1422"> <thead> <tr> <th>Exporter</th> <th>CCID</th> <th>Finish</th> <th>Measure</th> <th>Effective Rate of Duty</th> <th>Ascertained Export Price</th> <th>Export Terms</th> <th>DSN</th> </tr> </thead> <tbody> <tr> <td colspan="8">China</td> </tr> <tr> <td><u>Zhejiang Kingland Pipeline and Technologies Co Ltd</u> supplied directly or through: <u>Shanghai Minmetals Materials & Products Corp</u></td> <td>CCF9394999F CCH4937369W CCE7467936C CCH4937393X CCC7963996X CCE7474677L CCX6693664E CCH4793673E CCH4794676H</td> <td>All types</td> <td>IDD</td> <td>17.8%</td> <td>Confidential</td> <td>FOB, cash</td> <td>200</td> </tr> <tr> <td><u>Huludao City Steel Pipe Industrial Co Ltd</u> supplied directly or through: <u>Shanghai Minmetals Materials & Products Corp</u>; or <u>Tianjin Ruitong Huaxing International Trade Co. 7. What DSN do I use for my imported goods and what are the rates for my exporter?
(continued)

Exporter	CCID	Finish	Measure	Effective Rate of Duty	Ascertained Export Price	Export Terms	DSN
China (continued)							
<u>Tianjin Youfa Steel Pipe Co Ltd</u> supplied through: <u>Tianjin Youfa International</u>	CEM6634644K	All types	IDD & ICD	12.0%	Confidential	FOB, cash	202
<u>Dalian Steelforce Hi-Tech Co Ltd</u> supplied directly or through: <u>Steelforce Trading Pty Ltd</u>	CCJ9649694M 40110146515 CEC4946673N	All types	IDD	18.7%	Confidential	FOB, cash	203
<u>Qingdao Xianxing Steel Pipe Co. Ltd</u>	CCH9963366P	All types	IDD	100%	Confidential	FOB, cash	221
<u>All other Exporters</u>		All types	IDD & ICD	143.7%	Confidential	FOB, cash	204
Malaysia							
<u>Alpine Pipe Manufacturing SDN BHD</u> supplied directly or through: <u>Aspac Alliance Steels SDN BHD</u>	CCC9963774F CCL7999444L	All types	IDD	53.1%	Confidential	FOB, cash	207
<u>Melewar Steel Tube Sdn Bhd</u>	CFK4934947T	All types	DSA	53.1%	Confidential	FOB, cash	215
<u>All other Exporters</u>		All types	IDD	53.1%	Confidential	FOB, cash	208
Taiwan							
<u>Ursine Steel Co Ltd</u>	CCP6363677T CEJ4463947P CFE9794793Y CCY3447976A	All types	IDD	6.3%	Confidential	FOB, cash	213
<u>All other Exporters</u>		All types	IDD	23.9%	Confidential	FOB, cash	214

Please Note:

1. IDD and ICD ad valorem duty rates and AEP are considered confidential. Please see below on how importers can request the confidential rates
2. The actual duty liability may be higher than the effective rate of duty published due to the variable component of IDD that may be payable.

7. What DSN do I use for my imported goods and what are the rates for my exporter?
(continued)

The following DSNs apply to goods subject to the floor price measure and are exported from Taiwan and Korea and entered for home consumption on or after 3 July 2017.

Exporter	CCID	Finish	Measure	Normal Value (per tonne)	Export Terms	DSN
Taiwan						
<u>Far East Machinery Co Ltd</u>	CCC3933696L CFC3463993Y	All types	IDD - Floor	Confidential	FOB, cash	209
<u>Shin Yang Steel Co Ltd</u>	CEF3479347X	All types	IDD - Floor	Confidential	FOB, cash	210
<u>Ta Fong Steel Co Ltd</u>	CEE4439497P CCL7999444L	All types	IDD - Floor	Confidential	FOB, cash	211
<u>Tension Steel Industries Co Ltd</u>	CCN6773799W	All types	IDD - Floor	Confidential	FOB, cash	212
Korea						
<u>Kukje Steel Co Ltd</u> supplied directly or through: <u>Hyosung Corporation</u> ; or <u>Sunjin Co.Ltd</u> <u>Duferco SA</u>	CCT7963774W CCC4733934F CEJ7347667P CEM7399676R CCH3749967W	All types	IDD - Floor	Confidential	FOB, cash	205
<u>All other Exporters</u>		All types	IDD - Floor	Confidential	FOB, cash	206

Please Note: NV is considered confidential. Please see below on how importers can request the confidential rates

<p>8. How do I find out the confidential rate and ascertained export price for my exporter?</p>	<p>The IDD ad valorem rate, the AEP and NV for each DSN are considered confidential and will not be published.</p> <p>Importers of these goods may be provided with the confidential IDD ad valorem rate and the AEP, however the onus is on the importer to substantiate their commercial relationship with an exporter/supplier of their goods by providing evidence of:</p> <ul style="list-style-type: none"> • A previous trading history with a nominated exporter/supplier of the goods. Evidence of a trading history would take the form of at least commercial invoices, packing list and bills of lading from previous shipments. Additional documentation may be requested by the Commission; or • In the absence of a trading history, an offer or a quotation from an exporter/supplier of goods subject to dumping/countervailing measures. The offer or quotation must be on the exporter/supplier's company letterhead – emails will not generally be accepted. <p>Requests and evidence should be sent to clientsupport@adcommission.gov.au</p>
<p>8. How do I find out the confidential rate and ascertained export price for my exporter? (continued)</p>	<p>Please note:</p> <ol style="list-style-type: none"> 1. Any requests for the confidential information that do not include sufficient evidence as outlined above will be rejected. 2. Only as much of the confidential information as is necessary to enter the goods will be provided. <p>The ABF will conduct monitoring of imports subject to anti-dumping measures consistent with its published policy.</p>
<p>9. How long are the measures in place for?</p>	<p>The measures have been imposed for five years, unless revoked earlier.</p> <p>In the case of HSS from China, Korea, Malaysia and Taiwan the measures are in place until 2 July 2022.</p>
<p>10. Are there any exporters exempt from anti-dumping measures?</p>	<p>All exporters and suppliers of HSS from China, Korea, Malaysia and Taiwan are subject to IDD.</p> <p>All exporters and suppliers of HSS from China are subject to ICD except for Zhejiang Kingland Pipeline and Technologies Co Ltd, Huludao City Steel Pipe Industrial Co Ltd and Dalian Steelforce Hi-Tech Co Ltd.</p> <p>The 'all other exporters' rate of IDD and ICD will apply to exported goods unless an importer has evidence that the goods are being supplied either directly by a named exporter or through a linked supplier of a named exporter.</p>

11. What tariff classifications and statistical codes are covered by the anti-dumping measures?

Goods subject to measures should be classified using the tariff sub-headings and associated statistical codes below:

Tariff subheading	Statistical code
7306.30.00	31, 32, 33, 34, 35, 36, 37
7306.61.00	21, 22, 25
7306.69.00	10
7306.50.00*	45*
7306.61.00*	90*

* **Note:** The tariff subheadings (7306.61.00 (90) and 7306.50.00 (45)) only apply to the following exporters/suppliers:

- Dalian Steelforce Hi-Tech Co. (China);
- Tianjin Friend Steel Pipe Co. Ltd (China);
- Tianjin Ruitong Iron and Steel Co. Ltd (China);
- Roswell S A R Ltd (China); and
- Alpine Pipe Manufacturing SDN BHD (Malaysia).

For other exporters/suppliers not listed using the tariff subheadings (7306.61.00 (90) and 7306.50.00 (45)) the exemption type 'SUPPLIER' should be used.

Where importers are unclear on the correct tariff classification of their goods, it is recommended they contact the DIBP on 131 881.

12. What are the duty assessment importation and application period dates?

An importer of goods on which an IDD has been paid, may lodge an application with the Commissioner requesting that the Parliamentary Secretary make an assessment of the final liability of those goods to duty.

This usually occurs when an importer considers that the IDD paid in respect of goods exceed the total amount payable (i.e. importers consider they are entitled to a refund of duties). In relation to IDD, an importer may consider that the dumping margin for the goods is now less than it was during the investigation period, or that its exporter is no longer dumping, and as a result it has paid more duty than it should have paid.

There are a series of time frames fixed by legislation that govern the duty assessment system (referred to as importation periods). The duty assessment importation periods and application dates for HSS from China, Korea, Malaysia and Taiwan are as follows:

Importation Period	Application Period
3 January 2017 – 2 July 2017	3 July 2017 - 2 January 2018
3 July 2017 - 2 January 2018	3 January 2018 – 2 July 2018
3 January 2018 – 2 July 2018	3 July 2018 – 2 January 2019
3 July 2018 - 2 January 2019	3 January 2019 - 2 July 2019
3 January 2019 – 2 July 2019	3 July 2019 – 2 January 2020
3 July 2019 – 2 January 2020	3 January 2020 – 2 July 2020
3 January 2020 – 2 July 2020	3 July 2020 – 2 January 2021
3 July 2020 – 2 January 2021	3 January 2021 – 2 July 2021
3 January 2021 – 2 July 2021	3 July 2021 – 2 January 2022
3 July 2021 – 2 January 2022	3 January 2022 – 2 July 2022
3 January 2022 – 2 July 2022	3 July 2022 – 2 January 2023

More information about duty assessments is available on the [Anti-Dumping Commission website](#).
