1. What countries do measures apply to?	<p>On 5 August 2013, anti-dumping measures in the form of interim dumping duties (IDD) were imposed on zinc coated (galvanised) steel exported from the People’s Republic of China (China), the Republic of Korea (Korea) and Taiwan except for exports by Dongkuk Steel Mill Co. Ltd, Ta Fong Steel Co. Ltd and Sheng Yu Steel Co. Ltd.</p> <p>On 5 August 2013, anti-dumping measures in the form of interim countervailing duties (ICD) were also been imposed on zinc coated (galvanised) steel exported from China except for exports by Angang Steel Company Ltd, ANSC-TKS Galvanizing Co. Ltd, Yieh Phui Technomaterial Co. Ltd and Jiangyin Zongcheng Steel Co. Ltd. For more information about the description of the goods subject to measures, please refer to Final Reports [REP 190](#) and [REP 370](#).

**Please Note:**

1. When importing goods into the country importers are required to self-assess whether the imported goods meet the goods description outlined above and whether anti-dumping measures apply.
2. The Anti-Dumping Commission is not in a position to provide advice on whether certain goods meet the description above.
3. The use of exemption types is subject to monitoring by the Anti-Dumping Commission (the Commission) and the Department of Immigration and Border Protection (DIBP).

<p>3. How much Interim Dumping Duties (IDD) and Interim Countervailing Duties (ICD) will an importer have to pay?</p>	<p><b><u>IDD - all exporters (except Dongkuk Steel Mill, Ta Fong Steel, Sheng Yu Steel, Dongbu Steel Co. Ltd, Hoa Sen Group and Nam Kim Steel)</u></b></p> <p>IDD is in the form of a fixed and variable measure. The total IDD liability is calculated as follows:</p> <ul style="list-style-type: none"> <li>• fixed component of IDD: dumping export price (DXP) or ascertained export price (AEP), whichever is the greatest, multiplied by the applicable IDD ad valorem duty rate; plus</li> <li>• variable component of IDD: the amount, if any, by which the DXP is lower than the AEP.</li> </ul> <p><b><u>IDD - Dongbu Steel Co. Ltd</u></b></p> <p>IDD is in the form of a floor price measure. The total IDD liability is the amount, if any, by which the DXP is lower than the normal value (NV).</p> <p><b><u>ICD – all exporters from China and India (except Angang Steel, ANSC-TKS Galvanizing, Yieh Phui Technomaterial and Jiangyin Zongcheng)</u></b></p> <ul style="list-style-type: none"> <li>• The ICD liability is calculated by multiplying the DXP by the ICD ad valorem duty rate.</li> </ul>
<p>4. Example of how to calculate the Interim Dumping Duties (IDD) and Interim Countervailing Duties (ICD) liability</p>	<p>The following is an <b>example</b> of how to calculate the IDD and ICD liability.</p> <ul style="list-style-type: none"> <li>• DXP = AUD \$1,000 (Free-On-Board (FOB), cash)</li> <li>• AEP = AUD \$2,000 (FOB, cash)</li> <li>• IDD ad valorem rate = 10%</li> <li>• ICD ad valorem rate = 15%</li> </ul> <p><b>IDD liability</b></p> <p><u>Fixed component of IDD:</u> The higher of the DXP (\$1,000) or AEP (\$2,000) multiplied by the IDD ad valorem rate (10%). <math>\\$2,000 \times 10\% = \\$200</math></p> <p><u>Variable component of IDD:</u> The amount, if any, by which the DXP (\$1,000) is lower than the AEP (\$2,000). <math>\\$2,000 - \\$1,000 = \\$1,000</math></p> <p><u>Total IDD liability:</u> \$1,200 (\$200 + \$1,000)</p> <p><b>ICD liability</b> DXP (\$1,000) multiplied by the countervailing duty rate (15%) = \$150</p>

5. What is the dumping export price (DXP) and how do I calculate it?

The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.

**The DXP should be recorded on the relevant Full Import Declaration for the goods in the same terms as the AEP for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified for the AEP.**

For example, if the AEP terms are “FOB, cash” and the actual invoice terms of the goods are “CIF, 60 days, packed”, the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.

- step 1 - an adjustment for interest on credit terms will need to be made; and
- step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price.

Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.

An example of adjusting for credit and incoterms is provided below:

- Invoice terms = CIF, 60 days
- Specified terms = FOB, cash
- Export price - invoice amount = \$1,000
- Marine insurance and ocean freight amount = \$100

**Step 1 - adjust for credit terms**

1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%)
2. If the invoiced CIF, 60 days price is \$1,000, then the CIF, cash price = \$980 (\$1,000 less 2%)

**Step 2 - adjust for incoterms**

3. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent
4. CIF, cash price of \$980 minus freight and insurance amount of \$100 = \$880
5. The DXP price = \$880 FOB, cash

For further instructions/examples on how to calculate the DXP, please refer to the [Anti-Dumping Commission website](#).

<p>6. What information is needed to complete an import declaration for goods subject to measures?</p>	<p>The information required by an importer or Customs broker to complete an import declaration for goods subject to IDD/DSA is:</p> <ul style="list-style-type: none"> <li>• DXP;</li> <li>• Dumping Specification Number (DSN) or exemption type (where appropriate);</li> <li>• Country (this is usually country of origin or export country);</li> <li>• Tariff classification and statistical code;</li> <li>• Exporter / supplier; and</li> <li>• Quantity.</li> </ul> <p>Please see below to determine which DSN applies to the exporter of your goods.</p> <p>Further advice on how to complete an import declaration for goods subject to anti-dumping measures is available on the <a href="#">Anti-Dumping Commission website</a></p>																																
<p>7. Will dumping securities collected on my imports be converted to measures?</p>	<p>Securities taken in will be either cancelled or converted to IDD or ICD.</p> <p>The ABF will contact each affected importer/broker and provide relevant cancellation and/or conversion instructions for each consignment subject to security undertakings.</p>

13. What are the duty assessment importation and application period dates?

An importer of goods on which an IDD has been paid, may lodge an application with the Commissioner requesting that the Parliamentary Secretary make an assessment of the final liability of those goods to duty.

This usually occurs when an importer considers that the IDD paid in respect of goods exceed the total amount payable (i.e. importers consider they are entitled to a refund of duties). In relation to IDD, an importer may consider that the dumping margin for the goods is now less than it was during the investigation period, or that its exporter is no longer dumping, and as a result it has paid more duty than it should have paid.

There are a series of time frames fixed by legislation that govern the duty assessment system (referred to as importation periods). The duty assessment importation periods and application dates for zinc coated (galvanised) steel from **China, Taiwan and Korea** are as follows:

Importation Period	Application Period
5 February 2017 – 4 August 2017	5 August 2017 – 4 February 2018

5 February 2018 – 5 August 2018	5 August 2018 – 5 February 2019
